

A label, folded.

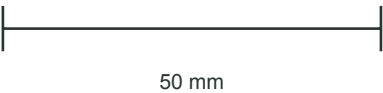

Triangular specimen tent · 80 mm long · Open ends

LINE KEY

PRINT CALIBRATION

Measure between the end ticks before cutting.

MAKE THE TENT

01 / Print & check

Use A4, actual size (100%).
Turn off "Fit to page" and
browser headers and footers.
Check the 50 mm bar below.

02 / Cut & crease

Cut only the solid outline.
Score all three dashed lines
with a ruler and blunt tool.
Fold with print on the outside.

03 / Join at the ridge

Panel 2 sits flat on the table.
Bring panels 1 and 3 together.
Glue the hatched tab inside
panel 1, behind its free top
edge. Align that edge with
the panel 3 / tab fold. Hold
until set. Leave ends open.

YOU NEED

Light card, scissors, ruler,
blunt scoring tool and glue.

ASSEMBLED / END VIEW
